

Dencor energy management system

Dencor energy management system

[What is this thing and can I get rid of it? : r/electrical](#)

It lets you set a maximum electrical current (demand limit) and starts turning off

[Old Dencor energy monitor in the house we're buying.](#)

Good Morning - This is Allen Amis of Dencor, and yes that is one of our original load controllers or specifically residential demand management systems. It is

[Load Controller For Demand Rates , Horizon Energy](#)

Simply put, a load controller is like a cruise control for your electric system. You set the level of savings, you reap the benefits. How does a load controller work?
