Electricity supply and demand
Access to electricity
Service quality
Responsibilities in the electricity sector
Sector policy
Renewable energy
History of the electricity sector

Installed power generation capacity in Guyana in 2007 was 226 MW or 0.4 kW per capita, which is lower than in other countries in the region and is hardly sufficient to cover the current demand for electricity in the country. Most electricity generation uses Diesel engines to drive generators. There are plans for introduction of power generation facilities based on renewable resources, but these would still account for
