

Inverter PV subsidies reduced

Overview

The NDRC emphasized that lower development costs have reduced the need for subsidies. Starting in June, new renewable energy projects will be subject to market-based bidding for electricity prices.

Inverter PV subsidies reduced

Withdrawing the visible hand: the impact of subsidy withdrawal policy

Main findings include: (1) The subsidy withdrawal policy significantly improves the TFP of PV enterprises. (2) The subsidy withdrawal reduces TFP by exacerbating financing constraints, but

Inverter PV subsidies reduced

SPE said the inverter industry "faces difficulties due to global manufacturing overcapacity and a slowdown in the rooftop PV segment in several important European markets."

China renewable energy subsidies

The reduction in subsidies could place additional strain on China's solar industry, which is already grappling with overcapacity and plummeting

China to Cut back Solar Subsidies

Reduced solar subsidies could add pressure on China's solar industry, where overcapacity relative to global demand has led to a drop in module prices.
