

Is selling solar photovoltaic panels profitable

The image shows a house with solar panels on the roof. In the foreground, there is a rack of solar inverters. The rack contains seven inverters, each with a digital display and a control panel. The inverters are white with black accents and have the 'WIDE' logo on them. To the right of the rack, there are four circular icons: a hand pointing to a button, a globe, a battery with a lightning bolt, and a bell with a lightning bolt. Below these icons are four text blocks: 'easy to install and use', 'World wide Products', 'faster charging and discharging', and 'Multiple protection with alarm systems'. Below these text blocks is the heading 'Can save energy' and a paragraph: 'the battery capacity can be increased freely and flexibly according to the situation of home use. Rechargeable lithium batteries use safe LiFePO4'.

easy to install and use

World wide Products

faster charging and discharging

Multiple protection with alarm systems

Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO4

Overview

Contrary to popular belief, the financial benefits of solar energy don't stem from selling excess power back to the grid but from significant savings and credits.
