

# It is not possible to live in a house after installing photovoltaic panels

## Overview

---

Let's clear the air - the overwhelming consensus among scientists and engineers is that solar panels are generally safe. While myths around solar panel radiation risk circulate online, there is no evidence proving that rooftop solar systems cause harm to people living underneath.

No. In a world where just about everything seems to cause cancer, solar energy adopters can rest assured that their rooftop panels will not create or add any unnecessary harm. For decades, studies have been performed to conclude that there are no associations between solar energy and cancer. For rooftop installations and large solar farms, global p See more on ppm.solar
