How do I push a new local branch to a remote Git repository and track

How do I: Create a local branch from another branch (via `git branch` or `git checkout -b`). Push the local branch to the remote repository (i.e. `git push`), but make it trackable so that `git pull` and

When to use "new" and when not to, in C++?

You should use `new` when you wish an object to remain in existence until you delete it. If you do not use `new` then the object will be destroyed when it goes out of scope.

javascript

`new()` describes a constructor signature in typescript. What that means is that it describes the shape of the constructor. For instance take `{new(): T; }`. You are right it is a type. It is the type of a class

new operator

In the specific case of throw, throw new() is a shorthand for throw new Exception(). The feature was introduced in c# 9 and you can find the documentation as Target-typed new expressions.

What is the 'new' keyword in JavaScript?

The new keyword in JavaScript can be quite confusing when it is first encountered, as people tend to think that JavaScript is not an object-oriented programming language. What is it? What problems

[How does the new operator work in JavaScript?](#)
