## Ratio Calculator

A ratio is a quantitative relationship between two numbers that describe how many times one value can contain another. Applications of ratios are fairly ubiquitous, and the concept of ratios is quite intuitive.

## Ratios

A ratio tells us how much of one thing we have compared to another. There are 3 blue squares to 1 yellow square.

Battery Gigafactory capex costs differ starkly by region. Average capex costs are lowest in China, higher in Other Asia, even higher in Europe,

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an

## **Ratio and Proportion**

The ratio  $a:b$  means  $\frac{a}{b}$  where  $k$  is the common factor  $k$  is multiplied to give equivalent fractions whose simplest form will be  $\frac{a}{b}$ . We can read  $a:b$  as 'a ratio b' or 'a to b'.
