

Self-built photovoltaic panels for self-use installation

Self-built photovoltaic panels for self-use installation

[DIY Solar System - How to Build Your Own Off-Grid](#)

Whether you're setting up an off-grid cabin, powering a shed, or reducing your electricity bill at home, a properly built solar setup can run for

Mockito is currently self-attaching to enable the inline-mock-maker

I get this warning while testing in Spring Boot: Mockito is currently self-attaching to enable the inline-mock-maker. This will no longer work in future releases of the JDK. Please add

[How can I make git accept a self signed certificate?](#)

Using Git, is there a way to tell it to accept a self signed certificate? I am using an https server to host a git server but for now the certificate is self signed. When I try to create the repo

Openssl : error "self signed certificate in certificate chain"

You have a certificate which is self-signed, so it's non-trusted by default, that's why OpenSSL complains. This warning is actually a good thing, because this scenario might also rise due

In CSS Flexbox, why are there no

"justify-items" and "justify-self"

Scenarios where these properties would be useful: placing a flex item in the corner of the flex container `#box3 { align-self: flex-end; justify-self: flex-end; }` making a group of flex items align

Self-reference for cell, column and row in worksheet functions

In a worksheet function in Excel, how do you self-reference the cell, column or row you're in?

dotnet publish --self-contained -> running the app still asks for

15 As the subject suggests, even if publishing with "--self-contained true" (and with a specific -r option), the runtime still asks for missing installation.

How can I generate a self-signed SSL certificate using OpenSSL?

How to create a self-signed certificate with OpenSSL The commands below and the configuration file create a self-signed certificate (it also shows you how to create a signing request).

What is the purpose of the 'self' parameter? Why is it needed?

For a language-agnostic consideration of the design decision, see What is the advantage of having this/self pointer mandatory explicit?. To close debugging questions where OP omitted a self

[Complete DIY Solar Panel System Guide 2025: Save \\$20,000+](#)

Learn how to design, install & maintain your own solar panel system. Complete DIY guide with permits, costs, safety tips & step-by-step installation.

[How can I create a self-signed certificate for 'localhost'?](#)

I've gone through the steps detailed in How do you use HTTPS and SSL on 'localhost?', but this sets up a self-signed certificate for my machine name, and when browsing it via <https://localhost>, I receive

security

This creates a self-signed (-r) certificate, with an exportable private key (-pe). It's named "My CA", and should be put in the CA store for the current user. We're using the SHA-256 algorithm.
