Solar power

Overview Economics Potential Technologies Development and deployment Grid integration Environmental effects Politics

In many countries, solar power is the lowest cost source of electricity. The typical cost factors for solar power include the costs of the modules, the frame to hold them, wiring, inverters, labour cost, any land that might be required, the grid connection, maintenance and the solar insolation that location will receive. Photovoltaic systems use no fuel, and modules typically last 25 to 40 years. Thus up
