Concentrated solar power

OverviewComparison between CSP and other electricity sourcesHistoryCurrent technologyCSP with thermal energy storageDeployment around the worldCostEfficiency

Concentrated solar power (CSP), also called concentrating solar power or concentrated solar thermal, involves systems that collect solar heat

for multiple purposes like cooking, desalination, or the generation of electric solar power, by using mirrors to concentrate a large area of sunlight toward a receiver. Electricity is generated when the concentrated light is converted to heat (solar thermal energy)
