China's Solar Power Generation Overtakes Wind for First Time

China's solar power generation overtook wind for the first time last year as a boom in cheap panels continues to reshape the country's grid and climate trajectory.

[National Survey Report of PV Power Applications in](#)

Technological innovation continued to strengthen China's position in the global PV industry. As of March 2025, China held efficiency records for

nine solar cell

[China's solar capacity installations grew rapidly in 2024](#)

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 GW of utility
