Lyten was founded in 2015 by Daniel Cook, Lars Herlitz, Scott Mobley and William Wraith III. Lyten develops a proprietary three-dimensional carbon material known as "3D Graphene", which is produced by converting methane into solid carbon and hydrogen gas via a carbon capture process. This material is described by independent sources as chemically and structurally different from traditional two-dimensional graphene. Lyten's 3D Graphene forms the foundation for several of its product lines, inclu
